

A screenshot of a text editor window in Ubuntu 20.04. The window title is "Ubuntu20.04". The left sidebar shows the "Activities" menu and a "Text Editor" dropdown. The main area contains a shell script with the following code:

```
1#!/bin/sh
2
3read -r -p "Enter the name of file:" file
4
5if [ -e $file ]
6then
7echo "File is exist"
8else
9echo "File not exist"
10fi
```

### OUTPUT

A screenshot of a terminal window showing the execution of the shell script. The window title is "rps@rps: ~/Music". The terminal output is as follows:

```
rps@rps:~$ cd Music
rps@rps:~/Music$ ./assignment1.sh
Enter the name of file:demo3.txt
File is exist
rps@rps:~/Music$
```
