

Assignment - 1

(Here it requires cloud credentials like user id & password)

- After that I can access to the Rps cloud lab portal.

Assignment 2

- Online multiplayer game is a real world application that relies on both parallel computing & network systems.
- In online gaming, parallel computing allows for fast & efficient processing of game logic & graphics on anyone's device.
- While networked systems enable communication & synchronization between players device over the internet.
- These are important because they provide a seamless gaming experience, allowing players to interact with each other in real time even though from any geographical locations.
